

Prestige Solar Thermal Packaged Solutions

All our solar thermal packs are designed for maximum system efficiency and are sized to meet current building codes of practice and the property needs; only market leading components are used giving unparalleled system performance and warranties.

All solar thermal packs are delivered with all the necessary components including 1st & 2nd fix pipe work &

connection fittings pack to make the installation smooth & trouble free.

Collectors & flashing kits / mounting rails along with the first fix pipe work pack can be requested first to enable all roof work to be carried out; all the other components can be delivered to site at a later date when requested to enable system completion.

Flat Plate Collector Packs

Vacuum Tube Collector Packs

Market Leading Unrivalled Warranty on Solar Thermal Collectors

Quite simply SOLFEX energy systems supply the highest quality engineered & performing Solar Thermal Products on the market, no exception to this are our warranty conditions. We were the first company in the UK to offer a 20 year warranty on our vacuum tubes back in 2007; other competitors with inferior single wall vacuum tubes with glass to metal sealings have tried to follow our example.

German Engineered & Manufactured Vacuum Tube Collectors

Unlike our competitors who only offer 5 year warranty, our CPC INOX manifolds, frames and mounting equipment are guaranteed for a full 10 years, our twin wall glass vacuum tubes are guaranteed for a full 20 years and are free of charge to all SOLFEX energy

systems / MCS accredited installers. We can offer this market leading warranty because of the high build quality and raw materials used within our vacuum collectors which have no moving parts or rubber O rings which are prone to failure within vacuum collectors, our stainless steel pipe registers with CPC INOX models are not susceptible to corrosion by faulty transfer mediums or leaks because they are welded instead of using O ring seal.

Austrian Engineered & Manufactured Flat Plate Collectors

SOLFEX energy systems offer the State of the Art FK series flat plate collector, this next generation collector is available in two sizes and in landscape and portrait versions, it can be mounted on-roof or in-roof and is available with RapFit push fit hydraulic connections saving valuable installation time. With efficiency (η_0) at 81.2%, a 10 year warranty, and black anthracite finish this collector stands out amongst its competitors.
